NOTICE TO CONTRIBUTORS:

The publishers wish to call your attention to the following instructions for preparing manuscripts for *Cognitive Psychology:* Format and style of manuscript should conform to the conventions specified in the "Publication Manual" of the American Psychological Association (1200 Seventeenth Street, N.W., Washington, D.C. 20036; 1974 Revision, $3.00), with the exceptions listed below. Please note that it is the responsibility of the author that manuscripts for *Cognitive Psychology* conform to the requirements of this journal.

INFORMATION FOR AUTHORS

Cognitive Psychology publishes original empirical, theoretical, and tutorial papers, methodological articles, and critical reviews dealing with memory, language processing, perception, problem solving, and thinking. This journal emphasizes work on human cognition. Papers dealing with relevant problems in such related areas as social psychology, developmental psychology, linguistics, artificial intelligence, and neurophysiology also are welcomed provided that they are of direct interest to cognitive psychologists and are written so as to be understandable by such readers. There are no maximum or minimum length restrictions for journal articles. Minor or very specialized studies are seldom accepted.

All manuscripts should be submitted to the Editor: **Dr. Earl Hunt, Department of Psychology, NI-25, University of Washington, Seattle, Washington 98195.**

Original papers only will be considered. Manuscripts are accepted for review with the understanding that the same work has not been and will not be published nor is presently submitted elsewhere, and that all persons listed as authors have given their approval for the submission of the paper; further, that any person cited as a source of personal communications has approved such citation. Written authorization may be required at the Editor's discretion. Articles and any other material published in *Cognitive Psychology* represent the opinions of the author(s) and should not be construed to reflect the opinions of the Editor(s) and the Publisher.

Authors submitting a manuscript do so on the understanding that if it is accepted for publication, copyright in the article, including the right to reproduce the article in all forms and media, shall be assigned exclusively to the Publisher. The Publisher will not refuse any reasonable request by the author for permission to reproduce any of his or her contributions to the journal.

A manuscript submitted for publication is judged by three main criteria: (a) appropriateness of the subject matter for this journal; (b) significance of its contribution to knowledge; and (c) clarity and conciseness of writing. No changes in a manuscript may be made once it has been accepted and is in press.

Form. Type at least double-spaced throughout, including tables, footnotes, references, and figure captions, with 1 inch margins on all sides. Submit four complete copies. Each copy *must* include all figures and tables.

Number the pages consecutively. *Page 1* should contain the article title, author(s) names(s), and affiliation; at the bottom of the page type a short title, not exceeding 35 characters and spaces, and the name and complete mailing address (including zip code) of the person to whom proofs should be sent. The address for correspondence should be given as a footnote to the appropriate author's name. *Page 2* should contain a short abstract, approximately 100 to 150 words in length.

Headings. The organization of the paper must be clearly indicated by appropriate headings and subheadings.

Abbreviations. Do not use final periods with units of measure that are abbreviated (cm, sec, kg, etc.) in text or in tables, except for "in." (inch).

Symbols. Underline letters that represent mathematical symbols; these will be set in *italic* type.

Equations. Number displayed equations consecutively, with the number placed in parentheses to the extreme right of the equation. Refer to numbered equations as Equation 1 or say "the first equation." Punctuate equations to conform to their place in the syntax of the sentence.

Abbreviations. Do not use final periods with units of measure that are abbreviated (cm, sec, kg, etc.) in text or in tables, except for "in." (inch).

Symbols. Underline letters that represent mathematical symbols; these will be set in *italic* type.

Equations. Number displayed equations consecutively, with the number placed in parentheses to the extreme right of the equation. Refer to numbered equations as Equation 1 or say "the first equation." Punctuate equations to conform to their place in the syntax of the sentence.

Footnotes. Use only when absolutely necessary, in which case type the footnotes consecutively, double-spaced, on a separate sheet of paper in the order of their appearance in the text. Use Arabic numbers 1, 2, etc. In the text, refer to footnotes by superscript, 1, 2, etc.

Tables. Number tables consecutively with Arabic numerals in order of their appearance in the text. Type each table, double-spaced throughout, on a separate sheet; avoid vertical rules. Supply a short descriptive title below the table number. Type table footnotes, lettered *a, b,* etc., at the end of the table. For further information, see the "Publication Manual," pages 43–50.

Illustrations. All illustrations are considered as figures, and must be supplied in finished form, ready for reproduction. Pages 50–55 of the "Publication Manual" describe concisely the proper preparation of line drawings and of photographs. Plan figures to fit the proportion of the printed page (allowing for the legend under the figure), and take care that lettering on the original is large enough to be legible after a reduction of 50–60%.

Number the figures with Arabic numerals in order of mention in the text. Supply descriptive legends (captions) for all figures. Type these (double-spaced throughout) consecutively on a separate sheet of paper.

References. Cite references in the text by surname of the author, followed by year of publication.

> Smith (1962) found that . . .
> Contrary results (Brown, 1969) have been . . .

When a reference has two authors, cite both names, as (Harris & Cooper, 1960). When more than two are involved, cite the surnames of all authors, with the date, at first mention, but in subsequent citations of the same reference give the surname of the first author followed by *et al.* and the year, as

> (Colberg, Matthews, Cooper, 1963) *first mention*
> (Colberg, *et al.*, 1963) *second mention*

In citing more than one publication by the same author or authors in the same year, add suffixes a, b, c, etc, after the year, as (Smith, 1962a) and repeat the letter identification in the bibliography at the end of the reference.

Under the heading REFERENCES, arrange the literature citations in the text in alphabetical order according to the surname of the first author. Do not abbreviate journal names; write them out in full. Full information on forms of literature citations may be found on pages 58–67 of the "Publication Manual."

The following examples show style of capitalization and punctuation for journal articles, books, and edited books:

Bryden, M. P. Attentional strategies and short term memory in dichotic listening. *Cognitive Psychology,* 1971, **2,** 99–116.
